PROJECTS

1.Zen-Z-Path (01/2023 - 04/2023)

- Zen-Z-Path is a Progressive Web Application (PWA) designed for school students in Tamil Nadu.
- It facilitates college and course searches, provides advisory connections, performs eligibility checks, and allows users to save their college searches.
- The application includes an admin panel for administrative purposes.
- <https://zenzpath.com>

2.Ticket Master (7/2023 - 10/2023)

- Ticket Master is a Progressive Web Application (PWA) that comprises client and employee panels, along with an admin dashboard.
- The application serves the purpose of raising tickets for clients and facilitates the resolution of these tickets by employees.
- <https://wahmicare.com/>

3.Training Management System (10/2023 - 07/2024)

- Training Management System is a SaaS-based application, and Lifesaver Learning Hub is a user-friendly online platform dedicated to equipping individuals with essential first aid skills.
- The platform provides accessible courses, certifications, and fosters a supportive community for confident and effective emergency response.

4.Casino Credit System (10/2024 - Present)

- Developed a Web application to modernize the internal Credit Department workflows. The previous system relied on MS Excel, Outlook, and desktop applications hosted on a shared drive with direct database access.
- The new solution streamlines credit processes and daily operations by providing a centralized platform with secure access.

PERSONAL PROJECTS

1.Quiz Application

– I've designed a versatile quiz app featuring three distinct formats: multiple-choice, true or false, and multiple-choice with multiple answers. The app also includes a preview option and functions for encrypting and decrypting answers, ensuring a secure and user-friendly experience.

– <https://quizcreationapp.netlify.app/> 

2.Form Creation Application

– Create dynamic forms effortlessly with our intuitive form builder, featuring a variety of input fields like text, radio, and checkboxes, along with drag-and-drop functionality and a live preview option. Design,

customize, and preview your forms seamlessly for a streamlined experience.

– <https://formcreateapp.vercel.app/> 

3.Weather Application

– I'm crafting a user-friendly weather app where users simply input a city name and click 'search' to retrieve detailed weather information effortlessly.

– <https://weathergetapp.vercel.app/> 

4.Customize Input Npm Package

– I created an npm package for React or Next.js projects.
